

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Bellevue Failed to Comply with a Testing Procedure

Last February the City of Bellevue failed to comply with a required testing procedure. Even though this was not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During February 2019, we did not record test results for Chlorine residual at 131 Tendoy, on our lab paperwork, and therefore could not be sure of the quality of your drinking water during that time.

Any sample we collect must be sent to and analyzed by a certified laboratory. We collected the sample on February 26, 2019 but did not get our chlorine residual recorded on sample paperwork to the laboratory.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What is being done?

Because it was a paperwork error and not a sampling error there was no new sample required, we have added additional training for staff to understand the importance of checking all paperwork. Additional training was completed on July 18, 2019. We are no longer in violation

For more information, please contact Kelly West at 208-913-0235 or P.O. Box 825 Bellevue Idaho 83313.

**Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*

This notice is being sent to you by City of Bellevue. State Water System ID#5070004.
Date distributed: January 28, 2020.
